

- Ideal to transport your external hard disk drives
- Shock protection: strong nylon material
- Reinforced EVA inner pouch
- Separated internal compartment
- Convenient adjustable shoulder strap
- External GSM pouch

Intended for the protection and for the transport of your external or multimedia hard disk, this bag will avoid shocks and scratches and let it close to hand if necessary. Its strengthened internal compartment allows to wedge and to protect your hard disk. Some free space is allocated to store cables. Very functional, it has many storage options - frontal pocket, lateral, interior compartment - that increases its capacity. Its front pocket will allow you to put away some small accessories, like memory cards or even your belongings. You can adjust easily its belt strap to carry it on the shoulder or slung across the back like a city bag. A must have accessory for your travel days!
